APPENDIX A: HIGH SCHOOL CROSS REFERENCE	27
---	----

Executive Summary

High school graduation rates are vital indicators of the success of various school improvement programs and of education reform efforts in general. The purpose of this study is to examine the proportion of students within the cohort class of 2004 who completed Arizona high school graduation requirements within five years. The cohort class of 2004 is comprised of students who entered ninth grade in the fall of the 2000-2001 school year and graduated from twelfth grade by the end of the 2004-2005 school year.

This report provides information about the number and proportion of students who fell into one of the following categories after their fourth year of high school: dropped out¹, status unknown or remained enrolled for a fifth year of high school. It also includes the proportion of students that obtained a General Educational Development certificate (GED)² within five years and a subsequent fifth year graduation rate, which is calculated using the number of students who graduated within five years as a proportion of the cohort membership. Herein, these rates are summarized at the state level, by gender and ethnicity, by county, and by district and school.

* * * * *

This report is based on a longitudinal study for which student enrollment and transfer activity were tracked over a five-year period to determine the proportion of students that entered high school in the 2000-2001 school year and graduated within five years (by the spring of 2005). This longitudinal method provides information about a particular cohort of students as it progresses through high school.

The cohort class of 2004 had a membership of 63,084 and consisted of five distinct ethnic groups. White students made up the largest proportion of the cohort at 54.6% and Asian students the smallest, making up 2.3% of the cohort population. (See Figure 1)

A brief overview of the cohort class of 2004 shows that:

- It had a total membership of 63,084 students
- **79.8% graduated in five years**
- 76.8% graduated in four years
- 3.6% enrolled in a 5th year of high school and
- 1.4% received a GED (high school equivalency certificate)

¹ The dropout rates discussed within this report are four year dropout rates specific to the cohort class of 2004. They are not comparable to the annual dropout rates calculated in the Annual Dropout Rate Study.

² For this study, those students who left school and earned a GED are not counted as graduates.

Figure 1: Cohort Membership by Ethnic Group

Data presented in this report show a wide gender gap in the five year graduation rates for this cohort: more than 83% of the females received high school diplomas, while 76.7% of the males graduated.

In addition to gender differences found in this study, there is a wide gap in the five year graduation rates of different ethnic groups. Hispanic and Native American students displayed consistently lower graduation rates, 71.1% and 68.7%, respectively, while White and Asian rates were much higher at more than 86% and 89%, respectively.

Further analysis of graduation rates shows that differences found in gender and ethnic groups compound to reveal even larger gender gaps within certain groups. Native American and Hispanic females graduated at rates that were 8% or above that of the males in those ethnic groups. African American females graduated at a rate nearly 11% above the male graduation rate, the largest gender difference within an ethnic group. (See Figure 2)

One of the more telling statistics in the current report is the difference between the four and five year graduation rates within certain ethnic groups. The largest difference within an ethnic group is seen in Native American males: 57.8% graduated in four years while 64.3% earned a diploma in five, a difference of 6.5%. In addition, Hispanic males demonstrated a 4.5% increase in fifth year graduation rate, when compared to the four year graduation rate.

The Arizona Department of Education (ADE) is committed to continued improvement of educational indicators by making the most accurate data available to policy makers and the public. As the state has moved to a standards based educational system and away from a “seat time” approach to graduation, five year graduation rates will continue to be used to measure the proportion of students who meet the standards.

Figure 2: Five Year Graduation Rates by Ethnic Group and Gender

Introduction

The calculations of four and five year graduation rates result from cooperative efforts among public school districts and charter schools, the ADE and the Arizona State Legislature. Presently, state and federal school accountability efforts require greater attention to performance measures, such as the graduation rate, which serve as key indicators of a school's success in educating its student population. AZLEARNS, Arizona's school accountability system, includes a school classification system based on a set of performance measures, including the five year graduation rate. Likewise, under federal No Child Left Behind legislation (NCLB), a four year cohort graduation rate is one criterion used to determine if a school has made Adequate Yearly Progress (AYP).³

Reporting Period

This report includes four and five year graduation rate calculations for the cohort class of 2004. Members of this class entered their ninth grade year in the fall of 2000 and were tracked from the first day of the 2000-2001 school year to the last day of the spring semester in the 2004-2005 school year. For the purposes of this study, students who graduated after their fifth year Spring commencement are not included as graduates.

Definitions⁴

The following terms are used within this report and are meant to convey these associated meanings:

Cohort class is defined as the group of students that entered ninth grade for the first time in the Fall of 2000, independent of the state or district where each student first enrolled. These students were expected to advance through high school as a group and become part of the same graduating class within five years after the start of their ninth grade year (in the Spring of 2004). Students who began their ninth grade year at one school and transferred to another school before their fifth year Spring commencement are still a part of the same cohort class.

Class membership represents the total student count within the cohort class and is defined according to the following:

³ For more information on both federal and state accountability systems, please refer to documentation on the ADE website at <http://www.ade.az.gov/azlearns/>

⁴ The dropout, still enrolled and four year graduation rates are reported after the fourth year. Only the five year graduation and GED rates include fifth year figures.

Original ninth grade enrollment
 + transfers in
 - transfers out
 - deceased

Class Membership

A class membership for any given school may change from year to year as students transfer in and out of schools. The accuracy of a school's class membership count is dependent on the school's ability to track student activity over the course of five years. (For more information, see *Limitations to Current Research*, p. 4)

Four year dropout rate is expressed as a percentage of the class membership and reflects the proportion of the cohort class of 2004 that left within the first four years of high school and did not return, graduate, transfer, receive a GED, or die.

Status unknown rate is expressed as a percentage of the class membership and reflects the proportion of the cohort class of 2004 that left within the first four years of high school, did not return, graduate, transfer, receive a GED, or die and whose academic status and location are unknown to the schools from which the students have left.

GED rate is expressed as a percentage of the class membership and reflects the proportion of the cohort class of 2004 that did not receive a high school diploma but earned a GED by the Spring commencement of the fifth year. To qualify for this outcome, the former student must have received a GED certificate, not merely enrolled in preparatory classes.

Still enrolled after fourth year is expressed as a percentage of the class membership and reflects the proportion of the cohort class of 2004 that did not receive a high school diploma by the end of summer recess of the fourth year but remained enrolled to attend a fifth year.

Four year graduation rate is expressed as a percentage of the class membership and reflects the proportion of the cohort class of 2004 that received a high school diploma by their **fourth** year Spring commencement in 2004.

Five year graduation rate is expressed as a percentage of the class membership and reflects the proportion of the cohort class of 2004 that received a high school diploma by their **fifth** year Spring commencement in 2005. This proportion is calculated using the total number of students who graduated within four years, as well as those who returned for a fifth year and graduated:

$$\left(\frac{\text{Graduates within four years} + \text{graduates in the fifth year}}{\text{Cohort membership}} \right) \cdot 100$$

Transfer Documentation

A student is not counted as a dropout if there is documented evidence of a transfer to another school that offers a high school diploma. School records must indicate the withdrawal status of each student who leaves the school. Documentation of a student transfer to another school consists of either (1) a request from another school for a transfer of the student's records or (2) information from a responsible adult that the student is enrolled in another educational facility from which (s)he may receive a high school diploma.

Methodology

After students entered ninth grade for the first time in the fall of 2000, they were identified as members of the cohort class of 2004. Over the next five years, each public school in Arizona tracked enrollment, transfer and graduation activities of students attending their schools. Four years later, after the Spring commencement in 2004, each school attributed one of the following outcomes to every student who was a member of the cohort class of 2004: *graduated, still enrolled, dropped out, status unknown, or GED recipient*. One year after the four year outcomes were reported, students who were members of the cohort class of 2004, and who graduated in a fifth year, were reported as five year graduates. Likewise, students who received a GED in the fifth year were reported as fifth year GED recipients. Four year and five year data on members of this cohort class were entered into a Graduation Rate Study online computer application and electronically submitted to the ADE.⁵ The ADE distributed forms and instructions for data collection to high schools via regional training centers and by mail. High schools required to submit data were defined as those having had student membership in *one or more* of the following grades over the course of four years **and** offered a high school diploma:

Membership in ninth grade in the 2000-2001 school year, **or**
Membership in tenth grade in the 2001-2002 school year, **or**
Membership in eleventh grade in the 2002-2003 school year, **or**
Membership in twelfth grade in the 2003-2004 school year, **or**
Graduated members of the cohort class of 2004 in the 2004-2005 school year
-And-
Offered a high school diploma

Schools that met these criteria were considered to have served members of the cohort class of 2004 at some point during the students' high school years and were required to submit data even if none of those students received a diploma from that school. Therefore, if all members of the cohort transferred to other educational facilities, it is

⁵ In the fifth year, schools only report students who receive a diploma or GED after their four year Spring commencement and before the first day of Summer recess at the end of the fifth year. Those who graduate after the Spring commencement of their fifth year are not reported as fifth year graduates.

possible for a school to have a class membership of zero with a corresponding zero graduation rate.

As of July 31, 2005, data were received from 413 public schools that satisfied one or more of the membership criteria stated above. In order to validate the data, the ADE conducted checks and contacted schools and districts to resolve discrepancies and clarify questions about inconsistent numbers.

Limitations to Current Research

This longitudinal study requires the use of five years of student records. The validity of this report is dependent upon a school's ability to track students who enter or leave an educational facility over time. Many students who are classified as *status unknown*, or *dropouts*, may have transferred to another educational facility in the state. A school's inability to track these students may artificially inflate the four year cohort class dropout rate and result in the under reporting of the class's graduation rate. Due to emphases placed on school accountability and stronger reporting requirements, schools have made improvements in their record keeping, and the ADE anticipates that improvements at the school level will continue to occur.

Additionally, the ADE has been working diligently to continue to improve its online computer tracking system, termed the Student Accountability Information System (SAIS). Once fully operational, it is the plan for future graduation rate data to be collected using SAIS, which will produce a more efficient and accurate student tracking system. Schools and districts are currently required to submit student enrollment and transfer activities at several junctions during the school year, allowing for SAIS to improve the accuracy of data significantly.

Various School Types. Within the state of Arizona resides a wide range of campus types including traditional, charter, alternative and schools in correctional facilities. The reader should note that, in general, different types of schools serve inherently different groups of students. Therefore, the dropout and graduation rates for different types of facilities should be interpreted using different groups of assumptions. For example, some schools target "at hope" students, a population in which a large percentage has already dropped out of school. Thus, the graduation rates of these schools, many of which are relatively low, tend to represent the proportion of students receiving high school diplomas *after* dropping out. In the end, graduation and corresponding dropout rates for different types of schools may be reflective of the state's dropout population, not the overall student population, that either receives a diploma or that drops out for a second time.

GED recipients. To qualify for a fourth or eventual fifth year GED outcome, a student must have actually received a GED prior to the end of the reporting period. A school must use any resource necessary to determine the status of a GED candidate, relying on interpersonal correspondence and communication. As a result, GED recipients are currently difficult for schools to track and their numbers may be greatly under-reported.

Results and Analysis

The four year dropout and still enrolled rates, along with five year GED and four and five year graduation rates for the cohort class of 2004, were computed and are presented in the following tables. Percentages in each category were calculated using the proportion of students to the total class membership count. The four year dropout rates presented in the following results are specific to the cohort class of 2004 and cannot be compared to the annual dropout rates calculated in the Annual Dropout Rate Study.

Statewide Dropout, GED, Still Enrolled and Graduation Rates

The class of 2004 had a membership count of 63,084. Of those, more than 79.8%, or 50,355, received high school diplomas in five years. Likewise, 3.6% were still enrolled at the end of four years, and 1.4% had obtained a GED (see Table 1).

Table 1: Statewide Dropout, Status Unknown, GED, Still Enrolled and Graduation Rates for the Cohort Class of 2004

Class Membership	Four Year Rates			Five Year Rates		
	Four Year Dropout	Four Year Status Unknown	Four Year Grad	Still Enrolled After Fourth Year	GED	Five Year Grad
63,084	4.9%	8.8%	76.8%	3.6%	1.4%	79.8%

Graduation Rate by Gender

A gender gap can be seen in the graduation rates for the cohort class of 2004. These data support a large body of literature dedicated to gender differences in graduation rates which indicates that females are graduating at a higher rate than their male counterparts. As seen here, of the 31,020 female members of the class of 2004, more than 83% obtained high school diplomas and 2.2% attained a GED. The graduation rate for males of this cohort class is lower at 76.7% (see Table 2).

Table 2: Statewide Dropout, Status Unknown, GED, Still Enrolled and Graduation Rates by Gender for the Cohort Class of 2004

	Class Membership	Four Year Rates			Still Enrolled After Fourth Year	Five Year Rates	
		Four Year Dropout	Four Year Status Unknown	Four Year Grad		GED	Five Year Grad
Male	32,064	5.9%	9.5%	73.3%	4.0%	1.6%	76.7%
Female	31,020	3.8%	8.1%	80.4%	3.1%	2.2%	83.1%
Total	63,084	4.9%	8.8%	76.8%	3.6%	1.4%	79.8%

Graduation Rate by Race/Ethnicity

Data for the cohort class of 2004 also indicate pronounced differences in the graduation rates by ethnicity. These data illustrate Asian students have the highest graduation rate at nearly 89.3%, followed by White students at over 86%. Native American students in this class show the lowest graduation rate at almost 69%. Also, White students in this cohort class have the highest rate of GED recipients over four years at 1.8% (see Table 3).

Table 3: Statewide Dropout, Status Unknown, GED, Still Enrolled and Graduation Rates by Race/Ethnicity for the Cohort Class of 2004

	Class Membership	Four Year Rates			Still Enrolled After Fourth Year	Five Year Rates	
		Four Year Dropout	Four Year Status Unknown	Four Year Grad		GED	Five Year Grad
White	34454	3.3%	5.6%	84.3%	2.1%	1.8%	86.1%
Hispanic	19891	7.1%	13.4%	66.6%	5.2%	1.0%	71.1%
Native American	4331	8.3%	14.5%	63.2%	8.2%	0.9%	68.7%
African American	2933	5.2%	9.8%	72.9%	3.9%	0.8%	76.4%
Asian	1475	1.8%	4.5%	87.1%	2.3%	1.0%	89.3%
Total	63,084	4.9%	8.8%	76.8%	3.6%	1.4%	79.8%

Note: in accordance with the Family Educational Rights and Privacy Act of 1974, data pertaining to fewer than ten students have been replaced with an asterisk () to protect student privacy.*

Graduation Rate by Gender and Race/Ethnicity

When ethnicity results are broken down by gender, as seen in Table 4, the differences found in each of these ethnic categories compound and the gender gaps become more evident. As seen in Table 3 above, Hispanic, Native American and African American graduation rates are much lower than White and Asian rates, but the gender rates within each show wider gaps still. As these data show, Native American males have the lowest graduation rate at just over 64%. Asian female students in this class have the highest graduation rate at 89.9%. The largest gender difference within a racial category is seen in the African American population: 81.8% graduation rate for females and a 71.3% for males, a difference of 10.5%. Native American males in this class show a graduation rate of 64.3%, which, along with the Hispanic and Native American male rates, are lower than any other group of students presented here. Congruently, the still enrolled rates for these students are the highest of any other gender and ethnic group combination (see Table 4).

Table 4: Statewide Dropout, Status Unknown, GED, Still Enrolled and Graduation Rates by Gender and Race/Ethnicity for the Cohort Class of 2004

		Four Year Rates				Five Year Rates		
		Class Membership	Four Year Dropout	Four Year Status Unknown	Four Year Grad	Still Enrolled After Fourth Year	GED	Five Year Grad
White	Male	17632	4.1%	6.1%	87.3%	2.6%	2.1%	88.7%
	Female	16822	2.5%	5.0%	81.4%	1.6%	1.4%	83.7%
Hispanic	Male	10060	8.4%	12.3%	62.4%	5.4%	1.1%	66.9%
	Female	9831	5.8%	11.4%	70.9%	4.9%	0.9%	75.4%
Native American	Male	2114	10.1%	15.6%	57.8%	9.2%	1.1%	64.3%
	Female	2217	6.5%	13.5%	68.4%	7.2%	0.8%	72.9%
African American	Male	1515	7.2%	11.4%	67.3%	4.6%	1.1%	71.3%
	Female	1418	3.1%	8.1%	78.9%	3.2%	0.4%	81.8%
Asian	Male	743	2.0%	4.6%	85.6%	3.2%	1.1%	88.7%
	Female	732	1.6%	4.5%	88.5%	1.4%	1.0%	89.9%
Totals	Male	32064	5.9%	9.5%	73.3%	4.0%	1.6%	76.7%
	Female	31020	3.8%	8.1%	80.4%	3.1%	2.2%	83.1%

Note: in accordance with the Family Educational Rights and Privacy Act of 1974, data pertaining to fewer than ten students have been replaced with an asterisk () to protect student privacy.*

Graduation Rate by County

Twelve of Arizona's fifteen counties attained a five-year graduation rate of 75% or above. Greenlee County, while serving the fewest number of students in the cohort at 123, graduated the highest percentage in five years at just under 95%. Maricopa County, serving the greatest proportion of students at 38,531, graduated 80.1% of students in five years, and presented a dropout rate of 4.6%. Furthermore, Yuma County graduated over 84% of the 2004 cohort, while, conversely, Yavapai County, which served a comparable cohort to Yuma, graduated 78.4% of students. Greenlee County displayed the lowest dropout rate in the state at 1.6%, while Pinal County maintained the lowest still enrolled rate at 2.3% (see Table 5).

Table 5: Dropout, Status Unknown, GED, Still Enrolled and Graduation Rates by County for the Cohort Class of 2004

	Class Membership	Four Year Rates			Still Enrolled After Fourth Year	Five Year Rates

Note: in accordance with the Family Educational Rights and Privacy Act of 1974, data pertaining to fewer than ten students have been replaced with an asterisk () to protect student privacy.*

Graduation Rate by District and School

Data for schools and districts are provided in Table 6. These data represent those schools that had membership for the cohort class of 2004 in any given year. Schools that did not offer a high school diploma or did not, at any point, serve students who were members of the class of 2004, were not required to submit data for this report. Charter facilities have been marked with a C symbol. **Note: the four year dropout rates presented in the following results are specific to the cohort class of 2004 and cannot be compared to the annual dropout rates calculated in the Annual Dropout Rate Study.**
